Promotion Guide

Wondering how to get promoted? Well you're in the right place. We've made it a little easier if you follow these basic things.

1. Commitment

In order to be promoted, you should show commitment. If you take on a specific task, you should try your best and not give up easily.

2. Tasks

You should try your best to take on numerous tasks & complete them or contribute towards the completion of the task.

3. Responsibility

You should not abuse your web development powers. Be responsible when coding & do not add unneccessary things. Collaborate with the rest of the team in a responsible manner.

Summary:

In order to be promoted and rise through the ranks, you ultimately have to do more than what is listed here. Try your best and don't try too hard! Good luck with your promotion journey!
